About your show

Indoor drone shows are typically made up of between 10 and 100 drones. We offer several pre-designed shows or a fully bespoke service.

We'll need at least 5m x 5m of clear space and an ideal ceiling height of 4 to 8 metres for our pre-designed shows.

How many drones?

Indoor drone shows use less drones than outdoor shows. As the number of drones increases so does the resolution possible. Here are some examples:

10 drones

20 drones

40 drones

KVANT

**We also offer indoor drones with
LASERS & LIGHTING**
